

Shaghayegh Bazrafkan

Front-End Developer — E-commerce & Product UI

Professional Summary

Front-end developer specialized in building scalable, conversion-focused web applications using React.

Experienced in translating complex Figma designs into pixel-perfect, production-ready interfaces.

Detail-oriented, reliable, and known for delivering tasks on time in both solo and team environments.

Technical Skills

Core: HTML, CSS, JavaScript, React

Styling: Tailwind CSS, Sass, Bootstrap

Tools: Git, GitHub, Vite, Figma

APIs: REST APIs, Mock APIs

AI: Prompt engineering, AI-assisted UI and asset generation

Featured Projects

Fotros — Advanced Clothing Store

Production-ready e-commerce front-end designed to simulate a real-world online shopping experience.

Includes advanced cart and wishlist functionality, product variations, user dashboard, search and filtering, and light/dark/system theme support.

.Built with scalable React architecture and custom mock APIs for real backend simulation

Blockchain Web Application (Team Project)

Collaborative front-end development for a blockchain-based web application.

Worked closely with backend developers, integrated real APIs, and contributed to UI/UX decisions after design changes.

Demonstrates strong teamwork, responsibility, and experience with real production workflows.

Soft Skills

- Highly detail-oriented
- Strong sense of responsibility
- Consistent on-time delivery
- Effective team collaboration
